PROFESSIONAL SUMMARY

Informatics Engineering student with experience in data analysis, digital transformation, research, and organizational leadership. Experienced in working on data-driven projects with government and industry stakeholders, including the Yogyakarta Regional Police and Ministry of Law and Human Rights. Led a 17-member team across three bureaus at HMTC ITS and developed strong analytical, problem-solving, communication, and leadership capabilities.

PROFESSIONAL EXPERIENCE

April 2025 – January 2026

Data Analyst Intern | ADS Digital Partner

- Collaborated with the Yogyakarta Regional Police to develop an early-warning system by scraping and analyzing 3,400 crime-related tweets, identifying potential risk hotspots through Social Network Analysis (SNA).
- Developed an issue-tracking and early-warning platform for the Ministry of Law and Human Rights (Kemenkumham) to support centralized monitoring and data-driven operational decision-making.
- Conducted data analysis and contributed to digital solutions for institutional and organizational needs.

July 2025 – December 2025

Research Assistant – Petrokimia Network Consulting Project

- Conducted field surveys to assess network signal quality and connectivity requirements.
- Designed network topologies and performed domain testing procedures to evaluate connectivity solutions.
- Consolidated technical findings and maintained project documentation for consultation reports.

September 2024 – December 2024

Intern | My ITS Learning, Administrator

- Managed the processing and uploading of educational content to the My ITS Learning platform, ensuring data integrity and accessibility.
- Supported the production and marketing of learning materials to improve student engagement and platform utilization.

LEADERSHIP EXPERIENCE

January 2025 – December 2025

Himpunan Mahasiswa Teknik Computer-Informatika (HMTC) ITS

Head of Student Talent and Interest Department

- Led and coordinated 17 staff members across three bureaus in planning and executing departmental programs.
- Oversaw the planning and implementation of 10 student development programs, coordinating team execution and program delivery.

- Managed cross-functional collaboration and delegated responsibilities to ensure effective execution of departmental initiatives.

RESEARCH & PROJECT EXPERIENCE

January 2025 – June 2025

Student Creativity Program (PKM) – Blockchain for SME Transactions | ITS

- Conducted research and developed a proposal for a blockchain-based transaction platform aimed at improving transparency and efficiency for SMEs.
- Selected as a Simbelmawa account recipient, qualifying for the final national funding selection stage.

January – June 2026

Financial AI Assistant – Personal Project

- Built a technical trading assistant using Retrieval-Augmented Generation (RAG) to combine financial knowledge retrieval with automated chart analysis.
- Integrated three Large Language Models (LLMs) through Ollama to generate analytical insights and actionable trading outputs.

January – June 2026

A Gan-Based Generative Replay Framework For Continual Learning In Intrusion Detection Systems – Final Project

- Developed a GAN-based generative replay framework to address catastrophic forgetting in continual learning for intrusion detection systems.
- Designed and evaluated a continual learning pipeline integrating Generative Adversarial Networks (GAN), Proximal Policy Optimization (PPO), and replay mechanisms to improve model adaptation to evolving network threats.
- Conducted comparative experiments across multiple learning scenarios and evaluated model performance using F1-score, precision, recall, and accuracy.

EDUCATION

- **Institut Teknologi Sepuluh Nopember (ITS)** — Surabaya, Indonesia
Surabaya, Indonesia *Bachelor of Informatics Engineering*
- Graduation 7 August 2026, *GPA: 3.39/4.00*

SKILLS

Data Analysis	Figma Design	Data Visualization
Microsoft Office Suite	SQL	Python
Analytical Thinking	Problem Solving	Golang
Word	PowerPoint	Excel
Leadership	Communication	Ollama
Claude	n8n	Dataiku
